Base Cabinet

Clean-In-Place (CIP) System

The 352 offers state-of-the-art technology in a small size for dispensing frozen drinks. The high capacity refrigeration system operates on 115VAC power eliminating the need for special 220VAC power normally required for dispensing frozen beverages. The unit offers a sealed pressurized delivery system for dispensing Frozen Carbonated Beverages (FCBs) or Frozen Uncarbonated Beverages (FUBs).

The 352 can be equipped with an optional Clean-In-Place (CIP) system to allow for dispensing of natural products such as cappuccino and fruit smoothies. The CIP system, combined with the pressurized sealed delivery system, offers an unmatched level of product stability while eliminating the need to tear down and sanitize the dispenser systems daily.

Designed for long life using proven Lancer FBD technology, the 352 offers unprecedented reliability and ease of service. Combined with Lancer's strong technical support, the 352 is the "next generation platform" for dispensing frozen beverages.
